Sprint® Secure Mobile VPN

Cruise between connections with Sprint Secure Mobile VPN

As officers move to different locations they roam between wireless network connections.

This causes mobile devices to lose network signal and access to mission-critical systems.

Sprint Secure Mobile VPN is an application that keeps mobile devices connected to internal networks while roaming. Officers will no longer rely on squad car laptops as their only source of information.

Officers are able to automatically access your internal networks from anywhere when they sign in to their mobile device.

Always have access to:

- ④ Crime scene evidence
- ④ Witness information
- ④ Suspect history
- ④ Active and archived case titles

Maintain Secure Connection. Access Information. Save lives.

What is included?

- Mobile VPN
- Two-Factor Authentication
- Unlimited Data while on Sprint Network
- Wireless Priority Service for voice calls
- Sprint Data Link & Static IP (Optional)

Benefits

Stay compliant with CJIS requirements

Allow officers to work seamlessly with automatic data roaming

Reduce officer time wasted reconnecting to mission-critical applications and systems

Use mobile devices from anywhere to access the same information as squad car laptops

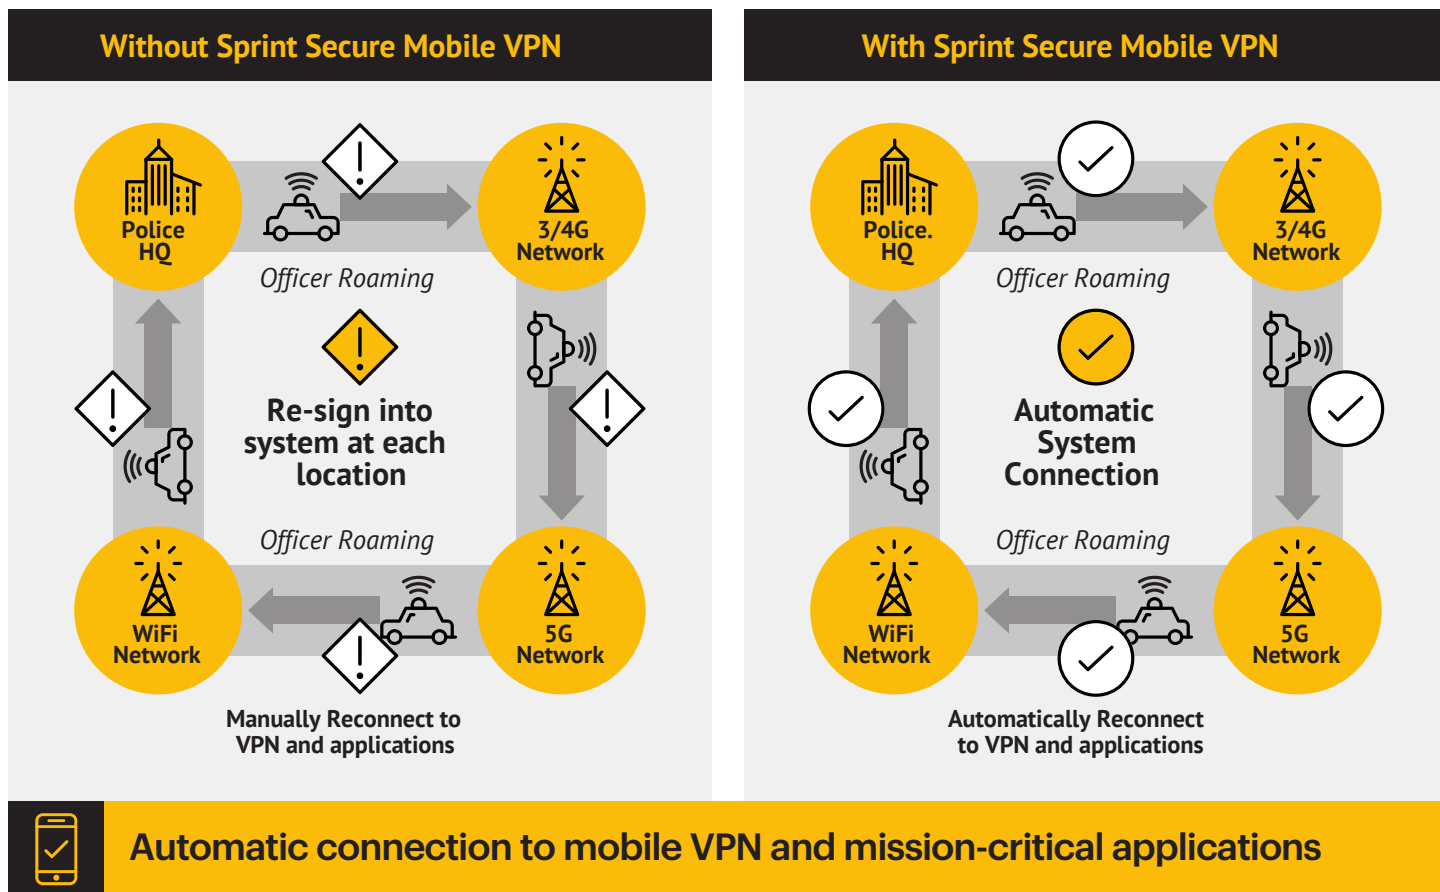

Wireless Priority Service (WPS): Customers req. DHS approval for eligibility and level of priority. WPS prioritizes voice calls while on the Sprint network and roaming (if supported by roaming carrier). **Other Terms:** Offers/coverage not available everywhere or for all phones/networks. Restrictions apply. © 2019 Sprint.

Business

How it Works

Sprint Secure Mobile VPN uses single sign-on to automatically connect to your internal network when unlocking your device.

Keep officers securely and seamlessly connected to your network resources.

- Ⓞ CJIS compliant to protect sensitive information
- Ⓞ FIPS 140-2 validated end-to-end encryption and two-factor authentication
- Ⓞ Save time with persistent connection to network resources
- Ⓞ Automatic roaming and persistent connectivity to network resources
- Ⓞ Transaction recovery protects against data loss during network disconnection
- Ⓞ Minimal drain on battery life
- Ⓞ Minimal memory usage for maximum device performance
- Ⓞ Great network performance with advanced data compression
- Ⓞ Available for Android, iOS, Windows
